PREVENTABLE

Talk with your doctor about getting screened.

COLORECTAL CANCER IS:

PREVENTABLE: Finding and removing hidden growths (called “polyps”) through the use of screening tests can prevent colorectal cancer before it starts. Ask your doctor about the right screening plan for you. Help reduce your risk by getting a screening test, not smoking, maintaining a healthy weight, exercising, eating less red meat, and consuming alcohol in moderation, if at all.

TREATABLE AND BEATABLE: Found in its early stages, colorectal cancer can be cured. Early colorectal cancer may have no symptoms, so talk to your doctor about screening.
